PROSTATE CANCER RESEARCH INITIATIVE
Commencing 2021

SECTION A: ADMINISTRATIVE DETAILS

1. Administering Institution

Mailing address

Title			
Address 1			
Address 2			
Address 3			
Suburb		Postcode	

Chief Investigator A – contact details

Name		email	
Telephone		Mobile	
Current Position			
Institution / Research Group			

2. Title

(maximum of 250 characters including spaces and line breaks)

SECTION B: RESEARCHER DETAILS

Team member details

Role	Title/Name	Institution	Position held	% Research Time
CIA				

**NB % Research Time refers to the percentage of research time to be allocated to the Initiative

For each researcher involved in this research please provide the following:

i a brief introductory paragraph. Please include information on their qualifications and skills, any contributions to research training and/or translation, their role in the research, and the time they will allocate to this research (maximum of 1,000 characters including spaces and line breaks using a 12 point font)

ii a list of all publications for the past five years (please include full citations for published papers or available details where publication is still pending)

iii a list of all current and pending research grants from the past five years awarded through a competitive process, including a sentence briefly specify their role in relation to each grant.

iv a list of presentations

SECTION C: RESEARCH SUMMARY

1. Executive Summary (maximum of 2000 characters including spaces and line breaks). Outline case for award of this initiative's impact on cancer research/cancer control and contribution to cancer research in WA. This should not include the research plan as this will be addressed in the research strategy.

2. Aims and Objectives (maximum of 1100 characters including spaces and line breaks)

3. Research Strategy (maximum of 6000 characters including spaces and line breaks)

4. Key Performance Indicators

Give details of **6-10** key performance indicators (KPIs) for your proposal. KPIs should be **specific**, **measurable** and include a **timeframe** (e.g. per year, by the end of the grant period etc). A list of outcome categories can be found in the guide to applicants.

Key Performance Indicator	**Outcome category**
	Choose a category.

	Choose a category.

5. **Proposed Budget** (maximum 1 page)

Note: funds to be expended over three years with a possible one year extension

SECTION D: COMMUNITY REVIEW CRITERIA

Important Information

- The community review criteria will be assessed independently of the rest of the grant application. Responses to the community review criteria should be written so they can be read without reference to the rest of the application.
- Answers should take into consideration that reviewers are members of the community who have been trained to assess research grant applications but are not researchers and do not have expertise in the specific field of the proposed research.
- All questions are compulsory. A written response addressing each question must be provided. Any application that does not respond to a question or indicates that any question is 'not applicable'/'not relevant' (or equivalent) or uses the response to the question to justify why the proposed research does not address the criteria will score zero for that criteria and risks being deemed ineligible for funding.
- Please refer to the accompanying 'Community Review Criteria Guidelines 2016' before completing this template. These can be found on the Cancer Council Website www.cancerwa.asn.au
- We recommend reading Cancer Council Western Australia's 'Writing Plain Language Summaries' guide before completing this section and using the 'Checklist for Plain Language Summaries and Reports' once you have completed this section.
- Applications must be completed in **12 point Arial font with 1.5 line spacing**

SECTION D: PLAIN LANGUAGE SUMMARY

1. Plain Language Title
Provide a title for your fellowship using plain language that can be understood by the general public.

1. Plain Language Summary

Provide an outline of your research proposal, this should be brief but include key information in a way that can be understood by the general public. Your plain language summary should include:

- An explanation of the type of cancer you are investigating and its impact
- Aims and purpose of the research
- How you will do the research
- What the benefits of the research will be

Limit: 2,000 characters (including spaces and line breaks)

2. Plain Language Aim

Provide a brief outline of your research aims using plain language that can be understood by the general public.

Limit: 300 characters (including spaces and line breaks)

SECTION E: COMMUNITY REVIEW CRITERIA

1. Plain Language Title

Provide a title for your fellowship using plain language that can be understood by the general public.

2. Research outcomes and the extent of potential benefit (impact)

Identify the anticipated direct outcomes of your proposed research. Describe how these outcomes have the potential to have a direct, beneficial impact on either the incidence or impact of cancer on our community. This includes short, medium and long term outcomes. If applicable, describe any particular relevance of the research to Western Australia and/or any specific benefits to the people of Western Australia from the research taking place here rather than elsewhere.

Limit: 4,000 characters (including spaces and line breaks)

3. Pathway for realising the benefit (translation)

Provide a clear description of the steps required to reach the stated benefits of the research. This may include further steps beyond the scope/timeframe of the proposed research.

Limit: 4,000 characters (including spaces and line breaks)

4. Equity

Explain which patient group(s) will benefit the most from your research (e.g. type or stage of cancer) and any equity implications. For research involving people, justify the selection of the study sample and explain why you have included and excluded particular groups who could potentially benefit from the outcomes of this research. If relevant, outline how the proposal addresses an under-studied or under-served population and/or a population with a high burden of disease or poorer outcomes.

Limit: 2,500 characters (including spaces and line breaks)

5. Community involvement

Outline how community representatives (consumers) have been involved during the development of the research proposal and the plan for ongoing community involvement in the research. Explain how this/these community representative(s) are 'qualified' to be involved.

Limit: 4,000 characters (including spaces and line breaks)

SECTION E: CERTIFICATION

LEAD APPLICANT I certify that the information contained within this application is correct and I have obtained approval from all other applicants to be included on this application.	
Name	
Signature	
Date	

Please Note: The source of supplementary funding should be listed below with appropriate sign-off by School / Faculty / Institution.

Please have the relevant Head of School, PVC, or other authorised delegate sign below to indicate approval of the possible contribution towards the initiative.		
Name	**Source (School/Faculty/Institution/Other)**	**Signature**

RESPONSIBLE OFFICER AT THE ADMINISTERING INSTITUTION	
Name	
Contact Details
