

If you're over 45 years old and still smoking,

go out and buy a very comfortable armchair.

One you won't mind sitting in for 15 hours a day.

The longer you smoke, the greater your odds of suffering a major debilitating disease such as emphysema in your later years. Don't blow the years ahead, stop smoking now and give yourself the best possible chance for a healthier future. For more information, call the Cancer Helpline on 13 11 20.
